MEMORANDUM FOR: C/HRB/CRD/OIS

FROM: [REDACTED]

SUBJECT: Follow-up Meeting with ITB r.e. computer support [REDACTED]

Yesterday I talked with the chief programmer in ITB about the results of last week's CCB meeting to see where they are in the development of a system for HRB records. [REDACTED] said they are only doing the non-programming things now. They have sent a request to OIT to expand the GIMS records in DECAL/ORIS. He has looked at the DECAL/ORIS code to see how and where modifications can be made to meet our needs. He will discuss the size of the system(i.e. how many years records need to be on-line) with IPD to set up an off-line file for non-active records. This should be done as one for the system, not one rule for HRB and another for IPD. We think 3 years of on-line records is sufficient.

He still holds to 2-4 weeks as all that is necessary to make the required modifications. He will not start however until we inform him of the results of our survey. He wants to do it all at one time instead of doing some now and other later and maybe even undoing some of his earlier efforts. It seems to me we need to build a fire under some of our cohorts.

*Thanks for the update.*

*I agree with him on this. We need to decide what we will need before we can expect them to give it to us.*
